

SPARTANBURG SANITARY SEWER DISTRICT
SIGNIFICANT INDUSTRIAL WASTEWATER
DISCHARGE PERMIT

PERMIT NO. _____

SIC NO. (S)_____

Issued in compliance with the existing provisions of the Spartanburg Sanitary Sewer District Rules and Regulations, the Federal Clean Water Act (PL 95-217) and the General Pretreatment Regulations for Existing and New Sources of Pollution (40 CFR Part 403), and any future supplements and/or changes thereto.

This permit grants permission to discharge wastewater into the wastewater treatment facilities of the Spartanburg Sanitary Sewer District either through District owned sewer lines or via the sewer collection system of one of the District's subdistricts. This permit does not grant permission to use the subdistrict's sewer system without prior subdistrict approval. (The subdistrict is Subdistrict B - "Metropolitan Subdistrict "B"). Permitted maximum daily flow is _____ gallons per day, not to exceed a maximum rate of ____ gallons per minute.

This Permit is granted in accordance with:

- a. The Industrial Wastewater Survey Questionnaire/Discharge Permit Application, dated _____
- b. Any plans, specifications, and/or other data submitted to and approved by the District and on file in the District's Business Office; and
- c. The effluent limitations, monitoring requirements and other conditions set forth in Parts I and II, hereof.

This Permit shall become effective on _____.

This permit and authorization to discharge shall expire at midnight on _____;
unless other conditions supersede, and thus, revoke or modify this expiration date.

Date

Joel H. Jones
Reclaimed Water Treatment Manager

B. Self-Monitoring and Reporting Requirements

1. Samples and measurements shall be taken as required in Item A, above, and shall be representative of the volume and nature of "normal" daily operations.
2. The Permittee must request District approval of the sampling point location prior to initiation of self-monitoring. The sampling point location is _____.
3. Self-Monitoring results shall be summarized _____ and reported on an Industrial Wastewater Discharge Self-Monitoring Form provided by the District.
4. Self-monitoring reports shall be postmarked no later than the 15th day of the month following the completed reporting period. The first self-monitoring report is due _____ for the reporting period _____ through _____.
5. Monitoring period averages, for reporting purposes, shall be calculated as the arithmetic mean of all samples collected during the report period. The arithmetic mean of any set of values is the summation of the individual values divided by the number of individual values.
6. The maximum daily flow limit expressed in this Permit is the 24-hour total flow.
7. A "composite sample" is any of the following:
 - a. Not less than four effluent portions collected at regular intervals over a period of process wastewater discharge during 24 hours and composited in proportion to flow.
 - b. An effluent portion collected at regular equal intervals continuously over a period of 24 hours with a minimum of 24 portions collected.
8. A "grab sample" is a single effluent portion which is not a composite sample. The sample(s) shall be collected at the period(s) most representative of the total discharge with the sample collection time(s) noted.
9. Test procedures for the analysis of pollutants shall conform to Title 40, CFR, Part 136. All tests must be performed by a SCDHEC certified laboratory.
10. For each measurement or sample taken pursuant to the requirements of this permit, and 40 CFR, Part 403.12, the Permittee shall record, at a minimum, the following information:
 - a. The date, the exact place and time, the method (including type of container and preservation) and the name(s) of person(s) taking samples;
 - b. The date and time each analysis was performed;
 - c. The name of the person performing the analysis (lab name and identification number);
 - d. The analytical techniques and results of analysis.

11. If the Permittee monitors any pollutant at the location(s) designated herein more frequently than required by this Permit, using approved analytical methods as specified herein, the results of such monitoring shall be included in the calculation and reporting of the values required in the Industrial Wastewater Discharge Self-Monitoring Form. Such increased frequency shall also be reported.

12. Industrial Wastewater Discharge Self-Monitoring form, and all other reports required herein, shall be submitted to:

P.O. Box 251
Spartanburg, South Carolina 29304
Attention: Industrial Wastewater Department

C. OTHER SPECIAL CONDITIONS

D. SCHEDULE OF COMPLIANCE

Note: This schedule may be added to the permit after the initial permit issuance.

1. The Permittee shall achieve compliance with the effluent limitations specified for discharges in accordance with the following schedule:

2. No later than fourteen (14) days following a date identified in the above schedule of compliance, the Permittee shall submit either a report of progress or, in the case of specific actions being required by identified dates, a written notice of compliance or non-compliance. In the latter case, the notice shall include the reason for non-compliance, any remedial actions taken, the date compliance is expected and steps being taken to return to the compliance schedule as originally set forth.

GENERAL CONDITIONS

1. All discharges authorized herein shall be consistent with the terms and conditions of this permit. The discharge of any pollutant, identified in this Permit, more frequently than or at a level in excess of that authorized herein shall constitute a violation of the Permit. Any anticipated facility expansions, production increases, or process modifications which will result in new, different, or increased discharges of pollutants must be reported by submission of a new Industrial Wastewater Survey Questionnaire/Discharge Permit Application or, if such changes will not violate the effluent limitations specified in this Permit, by written notice to the Spartanburg Sanitary Sewer District prior to implementation of such changes. Following such notice, the Permit may be modified to specify and limit any pollutants not previously limited, to change existing limits, or to add conditions to Part "C. Other Special Conditions" of this permit. The District must approve in writing any modifications to wastewater volume or characteristics before the changes being made by the Permittee.

2. In the event of any change in control or ownership of facilities from which the authorized discharges emanate, the Permittee shall notify the succeeding owner or controller of the existence of this Permit by letter, a copy of which shall be forwarded to the Spartanburg Sanitary Sewer District. The terms of this permit are transferable only with prior District approval.

3. The User is required to report all slug discharges, spills, bypasses or malfunctions of its pretreatment equipment and/or wastewater meter immediately by phone, followed within five (5) days in writing to Spartanburg Sanitary Sewer District, Industrial Wastewater Department, P.O. Box 251, Spartanburg, SC 29304, phone (864) 582-3250.

4. Upon promulgation of Federal Categorical Pretreatment Standards, the District will notify the applicable industries of any additional requirements, which may require modifications to, or reissuance of this Permit. Should the Permittee wish to contest the determination that the Standards are applicable, the District will provide the necessary steps to take in contesting this determination.

5. Within 180 days after the effective date of Categorical Pretreatment Standard, any non-domestic discharge that will have to meet that new Standard must report to the district as described in 40 CFR Part 403.12(b), as amended.

6. After notice and opportunity for a hearing, the Permit may be modified, suspended, or revoked in whole or in part during its term for causes including, but not limited to, the following:

- a. Violation of any terms or conditions of this Permit, the Spartanburg Sanitary Sewer District's Rules and Regulations and/or the General Pretreatment Regulations for Existing and New Sources of Pollution (40 CFR Part 403);
- b. Obtaining this Permit by misrepresentation or failure to disclose fully all relevant facts; or
- c. A change in any conditions that required either a temporary or permanent reduction or elimination of the authorized discharge.

7. The District may modify or reissue this Permit as local, state or federal regulations change or as needed to prevent pass-through or interference at the District's Treatment Plants, or to correct operating or maintenance problems at the District's Treatment Plants that are caused by

the discharge of a particular material or pollutant, or to prevent violations of the District's wastewater discharge permits or any permits to operate or ultimately dispose of sludge, regardless of the expiration date.

8. All Self-Monitoring Reports submitted to the District for review shall include, but shall not be limited to the following required information: the Self-Monitoring Report, all laboratory analysis reports from in-house and/or contract laboratories, all sample chain-of-custody records tracking the sample from collection to analysis, and any other documentation used to generate the Self-Monitoring Report. The District retains the right to require the submittal of any other supplemental information, which the District, at its sole discretion, deems necessary for an accurate evaluation of the Self-Monitoring Report, submitted by any user. The Permittee shall certify the accuracy of the Self-Monitoring Report submittal by properly completing and reviewing the Self-Monitoring Report form, and having the appropriate company official sign the report, as specified. Penalties, including civil and/or criminal, for failing to submit the required reports, falsification of reports, tampering with monitoring equipment, or tampering with the samples collected, violation of any discharge permit limits or requirement, or any portion of the District Rules and Regulations, are established in the District's Rules and Regulations in the Enforcement Response Guide.

9. The Permittee agrees to allow authorized employees of the District, the Department of Health and Environmental Control (DHEC) or the Environmental Protection Agency (EPA), access to and entry into the premises at any time, for the purposes of inspection, records examination and sampling, as connected with the District's Industrial Wastewater Program, and operation of the District's Sewerage facilities.

The Permittee agrees that authorized representatives of the District, DHEC, and EPA shall have the right to examine, inspect, copy, or require to be submitted to the District any record, report, document or information that the District deems necessary for the purpose of documenting compliance or non-compliance with applicable regulations and requirements, and/or as deemed necessary for determination of impact or impairment to collection and treatment systems, and/or as deemed necessary for inspection and/or enforcement proceedings.

10. The Permittee is required to maintain and make available for inspection upon request all records as required by this permit and 40 CFR, Part 403.12. The mandated three-year retention period will be extended during the course of any unresolved litigation regarding the Permittee or when requested in writing by SCDHEC or EPA.

11. The Permittee agrees to stop discharging in the event the District declares an emergency situation necessary to protect the wastewater treatment/collection system, employee safety, public health or the environment. The District may notify the Permittee by telephone to cease discharge and to resume discharge; this notification will be followed by a written verification.

12. If sampling performed by the Permittee indicates a violation, the Permittee shall notify the District within 24 hours of becoming aware of the violation. The Permittee shall also repeat the sampling and analysis and submit the results of the repeat analysis to the District within 30 days after becoming aware of the violation.

13. The Permittee shall prepare and implement a Slug Discharge Control Plan if the District deems one to be necessary to control slug discharges to the treatment plant.
